11.	_____	<input type="text"/>	_____
	12.	<input type="text"/>	_____
	13.	<input type="text"/>	_____

- Great Horned Owls' _____ size can range from 1-4 eggs.
- As the largest owl in San Diego, a Great Horned Owl's _____ stretches 3-5 ft.
- Like other owls, Great Horned's can turn their heads 270 _____.
- Owls' _____ are offset in their heads to help them locate sounds more effectively.
- Great Horned Owls are _____, meaning they're more active at night.
- Baby owls are called _____.
- Mated pairs of Great Horned's will fiercely _____ their territories and nests from other animals (and even people!).
- Because of ridges on the edges of their feathers, owls have almost completely _____ flight.
- Great Horned Owls are the only owls in San Diego who make the standard _____ noise.
- When hunting, Great Horned's will often sit on a _____ to wait and watch for their prey.
- Owls feed mostly on small _____ and birds.
- Because of their impressive eyesight and hearing, Great Horned Owls can hunt in almost complete _____.
- Owls' large _____ are fixed in their sockets, helping them to work together with their ears to pinpoint where movement and sound is coming from.

I pledge to be an advocate for all of the amazing wild animals that call San Diego home, like Soylala the Great Horned Owl!
